TM SYSTEM INTEGRATOR V-1.0

PRODUCT OVERVIEW:

- TM System Integrator is a unique wizard that can be used by any and every one with minimum IT expertise.

- It is designed mainly for the exchange of data between two or more databases, by pulling data from one database and pushing it to the another one

- It is a windows-based application compatible on both 32 and 64-bit operating system.

- This application supports the feature of periodic execution of the integration, which eliminates the necessity of developing additional services such as windows task-based scheduler, Linux Cron jobs etc.

- It is ideal for exchange of data through integration process between e-commerce platform to ERP system or from a time attendance machine to HR system and many such more

- This application also enables the user to get their data from cloud to on premises or vice versa.

KEY FEATURES:

1) Task Management
2) Task Scheduling
3) Supports MY-SQL to MS-SQL & MS-SQL-to-MS-SQL data pushing.

TASK MANAGEMENT:

Each integration is regarded as a task. These tasks can be created and deleted as per the user's requirement. It also enables the user to view a detailed log of the operations for each task initiated in the application.

TASK SCHEDULING:

Each Task can be configured to run on periodic intervals making your data available at your desired destination in an effective and timely manner.

SUPPORTS MY-SQL TO MS-SQL & MS-SQL-TO-MS-SQL DATA PUSHING:

One can easily import data tables from MY-SQL database to MS-SQL database similarly from MS-SQL database to another MS-SQL database that are residing either over a cloud or any other infrastructure with just few button clicks with no additional programming required to achieve the same.
